Profile

I'm an aspiring front end developer with a passion for learning. My 15 years of being a PC gamer has given me a strong foundation to become a computer wizard. During my time at BCIT, in the Digital Design and Development program, I learned a lot about UX Design and frontend development. I'm excited to continue my journey as a frontend developer with a passion in programming and problem solving.

Projects

Burger Planet – *An interactive 3D web app about Burgers*

- Built dynamic reusable components for 3D alphabet character mesh models
- Created various interactions with 3D models such as interaction on scroll and interaction on click using react hooks and react three fiber library
- Edited gltf files using blender to customize and edit 3D models for a smoother development of interactions

Pathfinder – *A web app that helps people with accessibility issues access documents online by adjusting text settings in a document*

- Built functional components and various ui components from mock up designs provided by designers in React using styled components and framer motion library
- Used Storybook for ui development to create and test components
- Took part in weekly stand ups to highlight each other's progress and and roadblocks

Blackjack Card Game – *A card game web app*

- Built with React hooks to manage cards in player and dealer hands
- Uses Deck of Cards API to generate deck keys and to shuffle deck of cards randomly
- Designed and built UI components and micro animations with framer motion
